# QA Automation Playwright Python / JavaScript

## Despre mine

I am a dedicated professional passionate about software quality, with extensive manual testing and beginner-level automated testing experience.

Throughout my manual testing experience, I have effectively used development tools and testing instruments to identify and resolve errors, managed error tracking in Jira, assigned tasks, and monitored project progress.

I am proficient in Postman for API testing and understand client-server architecture and data transfer methods. My knowledge of HTML, CSS, and SQL enables me to analyze UI elements and execute database queries. I am experienced in GIT for version control and writing API specifications in YAML for Swagger.

In automation testing, I use Python for scripting, with experience in frontend testing with Selenium and backend automation with the Requests library. My initial knowledge of Docker and GitHub Actions helps me set up automated testing environments and CI/CD pipelines.

My goal is to enhance my automation testing skills to become proficient in this field.

## Experiența profesională

**QA Manual += Automation** · Development Aid · Chișinău

*Septembrie 2023 - Prezent · 1 an 5 luni*

Performing manual tests for both front-end and backend to ensure product quality. Generating bug reports and actively contributing to product quality improvement.

I touched a bit on Automating of interface tests using Python and Selenium. Developing API specifications in YAML for Swagger and automating the API with the requests library.

Competențe: CI/CD Integration, Scripting & Programming, Testing Frameworks, Python, Selenium, Pytest, Debugging & Reporting, Playwright, JavaScript, Allure, Docker, Automatizarea Testelor

## **QA Manual · Romark Code · Chişinău**

*Februarie 2022 - August 2023 · 1 an 7 luni*

I helped familiarize the team with the work of the quality test engineer and the collective role in improving product quality. In addition, I actively participated in team and client meetings. Similarly, we conducted product testing using checklists and test cases we created, promptly documenting issues identified in bug reports and ensuring proper functionality. All these efforts aimed to finally deliver a high quality product.

Competențe: Backend testing, Postman, Quality Focus, Attention to Detail, Organization

## **QA Manual · Paynet · Chişinău**

*Mai 2021 - Februarie 2022 · 10 luni*

- Testing and error documentation of web and mobile applications.

- Project management and collaboration with product owners.

- Creating documentation about the developed and tested product.

Competențe: Bug Tracking & Reporting, Knowledge of Software Development Lifecycle, Test Planning & Design, Project Management, Web Testing, Mobile Testing
