Skills

- Java (Programming Language)
- Spring Framework
- PostgreSQL
- Maven
- Restful APIs
- OOP

Work experience

Junior Java Developer · Argenta · Moscow
March 2024 - Present · 9 months

- Developed and maintained a Safe City platform with a real-time data monitoring
system.
- Integrated the API with the frontend application.
- Decreased the number of bugs by 20% through improved testing and debugging processes.
- Automated reporting by creating and adapting .XLSX and .DOCX templates, reducing
documentation time by 30%.
- Created and maintained unit tests to ensure code quality.

Tech stack: Java (8, 11), Spring Boot, Hibernate, Jasper Reports, Spring MVC, REST API, Bitbucket, GitLab, PostgreSQL, Flyway, Maven, JUnit.

Skills: Java, Spring Framework, Hibernate, PostgreSQL, Maven, OOP, SOLID, Flyway, Jasper Reports, Jira, Bitbucket, Gitlab

Junior Java Developer · TechSprint · Warsaw
October 2022 - February 2024 · 1 year 5 months

- Developed a RESTful API for managing projects, tasks, and resources using Spring Framework and Spring MVC, enhancing frontend interaction and reducing response time by 15%.
- Optimized CRUD operations using Spring Data and Hibernate for PostgreSQL, improving system performance.
- Integrated external services and APIs using OpenAPI (Swagger) for streamlined documentation and testing, accelerating error detection and improving API
interaction.
- Created and utilized unit tests to ensure code reliability.
- Utilized Docker to containerize applications, ensuring consistency across development environments and setting up basic Docker Compose configurations for
effective management of service dependencies.
- Integrated Apache Kafka for real-time data streaming and communication between services.

Tech stack: Java (17), Spring Framework, REST API, PostgreSQL, Liquibase, OpenAPI, Gradle, GitLab, Docker, Apache Kafka, JUnit.

- SOLID
- Gitlab
- JasperReports
- Swagger
- Docker
- Apache Kafka
- JUnit

Driving licence

Category: A, B

Skills: Java, Spring Framework, Spring MVC, Hibernate (Java), PostgreSQL, Liquibase, Restful APIs, Git, Docker, Apache Kafka

Desired industry

- IT, Tech

Education: Higher
