Inginer tehnic

About me

I'm Maxim, a student at moment but in future an engineer focusing on machinery, refrigeration, and climate control systems, with a strong creative side. Under the name 'Licht,' I write poetry and explore themes like sacrifice, power, and human nature, drawing inspiration from philosophy, anime, and music. I'm also involved in my community, helping to support food distribution efforts for the elderly. Writing allows me to blend my technical and philosophical interests, and I'm always looking to learn and expand my perspective.
